

Biological Diversity Action Guideline

Tera Probe respects the Charter and frameworks on biodiversity and establishes action guideline to conserve biodiversity under our recognition that biodiversity is an important foundation for a sustainable and prosperous society.

1. We will enhance awareness of the importance of biodiversity conservation and encourage voluntary activities through educational activities for employees based on the understanding that it is important to develop human resources as its practitioner in order to penetrate biodiversity conservation into the society.
2. We will accelerate green procurement in light of biodiversity, with recognizing its impact of the entire supply chain, including procurement of equipment.
3. We will strive to conserve biodiversity in forests, rivers, and oceans through communication and collaboration with local communities, schools, and government agencies.
4. We actively disclose information on our biodiversity conservation efforts and promote those sharing with stakeholders.
