

Environmental Policy

Environmental Philosophy

We will contribute to the realization of a comfortable society and environment where people around the world can fully show their humanity and, respect the natural way of life through seeking technology harmonized with, and production friendly for, the environment.

Guidelines for action

We are committed to harmony with the environment as one of its highest management priorities, and each and every member at Tera Probe is committed to preventing environmental pollution and prioritizing environmental friendliness in all of our corporate activities.

[Business Initiatives]

We will address reduction of CO2 emissions and improvement of its basic unit for energy saving requirements as well as promote resource and energy saving in conformity with environmental protection through pursuing more efficient productivity, product miniaturization and higher performance with its evaluation friendly for environment and safety at the stage of development and design of production line.

[Compliance with environmental regulations]

We will set voluntary control standard and strive to improve the level of environmental management as well as comply with all applicable national and local regulations for environment.

[Communication]

We will provide environmental education to all employees to have them improve their environmental awareness, and disclose the environmental activities to our customers, local communities, and all other internal and external stakeholders.

[Continuous Improvement]

We will contribute to the realization of a sustainable and developed society by establishing an environmental management system, with updating it along with the latest environmental standard, and promoting continuous improvement activities.
