

Information Security Policy

We set four basic policies to protect our information assets from various threats, to ensure necessary information security, and to secure our continuous and stable business activities as follows:

- We will ensure the security of our trade secrets (including customers' information assets) in our operation;
- We will build and continuously improve the information security management system, and implement appropriate security measures according to those importance;
- We will conduct internal training and enlightenment on information security to ensure management and awareness of it.
- We will strive to prevent any occurrence of information security incident, and quickly take restoration and preventive measures in case of an incident occurs.
